WELCOME TO QCAB Q-LITE

A next-generation elevator ceiling system.

QCAB's Q-Lite Series is engineered for fast installation, reduced downtime, and premium modern aesthetics. Replaceable, lightweight panels suit both new elevator cabs and retrofit projects — while maintaining full compliance with ASME A17.1 code for general and emergency lighting.

KEY BENEFITS

- 01 Lightweight construction**
Significantly reduces load on the elevator cab while maintaining structural integrity.
- 02 Pre-wired LED lighting**
Factory-integrated general + emergency lighting dramatically reduces on-site work.
- 03 Modular & replaceable**
Individual panels swap out easily for maintenance or future updates.
- 04 Optional frame system**
A dedicated Q-Lite frame delivers a clean, professional, structured installation.
- 05 Fast lead times**
Available in any size, typically delivered in under two weeks.
- 06 Code compliant**
Fully meets ASME A17.1 lighting & safety requirements.

INSTALLED EXAMPLES

**Clean lines, even light,
beautifully finished.**

MODERN WOOD-TONE CEILING · INTEGRATED LED GRID

PREMIUM FINISH · EVEN ILLUMINATION

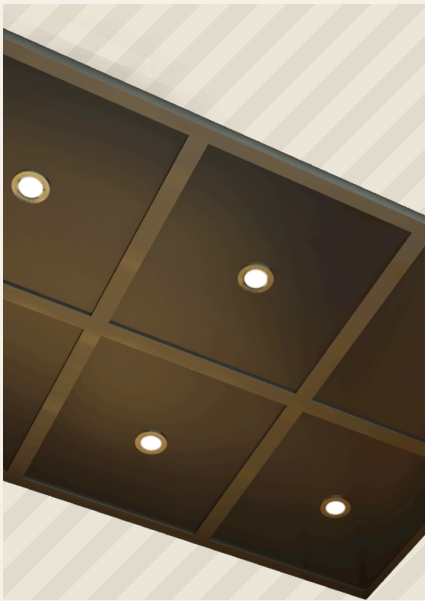

CONTEMPORARY CAB INTERIOR

PANEL STYLES

Replaceable, lightweight panels — ready to install.

A range of styles that harmonize with spaces and design features of every kind, pre-wired for fast, simple installation.

Style 01

Down Ceiling

A recessed, layered ceiling that adds depth and a refined architectural profile to the cab.

Style 02

Molding

Framed detailing and crisp molding lines for a classic, premium finished appearance.

Style 03

T-Frame

Drop-in panels for existing or new T-grid ceilings — clean, structured and efficient.

TECHNICAL SPECIFICATIONS

Engineered for elevators.

Material	Lightweight composite panels engineered specifically for elevator environments.
Lighting	Pre-wired LED — general + emergency — fully ASME A17.1 compliant.
Installation Options	Drop-in, T-frame / grid, or the optional dedicated Q-Lite frame system.
Weight Advantage	Substantially lighter than traditional ceiling systems.
Customization	Any size, with multiple styles and premium finishes available.
Compliance	ASME A17.1 lighting & safety requirements.
Lead Time	Typically under two weeks.
Support	Full technical assistance, or turnkey installation by the QCAB team.

ASME A17.1

Every Q-Lite ceiling ships with code-compliant, factory-integrated general and emergency lighting — giving you complete peace of mind on inspection day.

INSTALLATION METHODS

Designed for speed and simplicity.

Q-Lite ceilings minimize elevator downtime with three flexible installation paths.

1**Direct Drop-In / Retrofit** MOST COMMON

Remove the existing ceiling, position the lightweight pre-wired panels, and make quick electrical connections. Often completed in just a few hours.

2**T-Frame / Grid System**

Drop panels into an existing or new T-grid for a clean, professional, structured appearance.

3**Full Q-Lite Frame System** FOR NEW BUILDS

Mount a custom frame to the elevator canopy, then install modular panels into the frame — maximum rigidity and the most premium finished look.

+ **Flexible support.** Work with your own licensed elevator contractor — QCAB provides full technical support — or choose QCAB's experienced turnkey installation team for a seamless, end-to-end project.

CASE STUDIES

Premium installations, delivered.

HOSPITALITY

Marriott

Custom elevator cab interiors designed to reflect Marriott brand standards while streamlining production and installation.

HOSPITALITY

Hilton

A hospitality-focused cab interior solution designed to elevate the guest experience while streamlining delivery and installation.

WHY CHOOSE QCAB Q-LITE?

Precision-engineered ceiling solutions.

- ✓ Dramatically reduced installation time and labor costs
- ✓ Premium, modern, high-end appearance
- ✓ Built-in code-compliant lighting (ASME A17.1)
- ✓ Lower overall weight on the elevator cab
- ✓ Easy future maintenance — panels are replaceable
- ✓ Backed by QCAB in-house manufacturing & support

Request a quote and QCAB will deliver the complete catalog — showcasing every panel series, finish and technical accessory. For drawings, finish samples or project-specific recommendations, get in touch.
